$f(x) = x - 2 = 0$ ← Polynôme 1ère degré

$a = 1$, $b = 3$

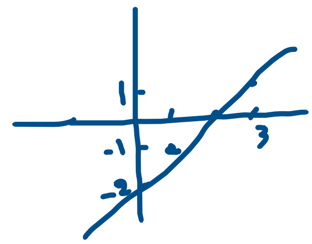
$\begin{cases} f(1) = -1 < 0 \\ f(3) = 1 > 0 \end{cases}$

trouver α :

I1 : $\frac{a+b}{2} = \frac{4}{2} = 2$

$f(2) = \boxed{0}$

$\boxed{1}\ x + (-2)$



$f(\alpha) = 0$

$\boxed{f(x) = x - 3}$ $\boxed{\alpha = 3}$

$[a, b] = [0, 8]$

I1 : $\frac{a+b}{2} = 4 \Rightarrow f(4) = \boxed{1}$

$f(4) \cdot f(0) = 1 \times -3 = -3$

$b = 4, a = 0$

I2 : $m = 2 \Rightarrow f(2) = \boxed{-1}$

$f(-1) \cdot f(0) = -1 \times -3$
$= 3$

$a = 2, b = 4$

I3 : $m = 3$ $\boxed{\Rightarrow f(3) = 0}$
